

To whom it may concern

Between November 04 and March 05, Philip Nolan was contracted by TMC Services Inc. to create a complete series of animation sequences for a new engineering system TMC is developing.

Mr. Nolan did an outstanding, thoroughly professional job which contributed in no small measure to the successful introduction of this new concept with our government sponsors.

Provided only with a series of written draft scenarios for the animation and general guidance over the telephone, Mr. Nolan worked very hard and very creatively to not only meet but exceed our expectations. Mr. Nolan proved to be very resourceful in taking initiatives to illustrate all of the sequences with multi-layered details to depict the projected operation of our system in various environments. The level of technical details Mr. Nolan introduced in these sequences made the whole animation a very powerful tool to not only visualize but improve our system.

TMC Services Inc. could not be more pleased with the quality of the work performed by Philip Nolan under a very tight schedule. Attention to details, creativity, dedication and intelligent, professional feedback are all there in this work. TMC Services Inc. will definitively hire Mr. Nolan again for its future projects.
